Re: Delta Shipyard Superfund Site, Houma, Terrebonne Parish, Louisiana
SSID No. 06GC

Dear Sir or Madam:

The U.S. Environmental Protection Agency (EPA) seeks cooperation from the Ashland Inc., a Kentucky corporation that was organized March 15, 2004, in the State of Kentucky, in providing information and documents relating to the Delta Shipyard Superfund Site (Site). Obtained information from you will aid the EPA in its investigation of the release or threat of release of certain hazardous substances, pollutants or contaminants at this Site. Your response will also help the EPA develop a better understanding of activities that occurred at the Site.

This information request is not a determination that you are responsible or potentially responsible for contamination that occurred at the Site. The EPA is sending this letter as part of its investigation of the Site and does not expect you to pay for or perform any site-related activities at this time. If the EPA determines that you are responsible or potentially responsible for response activities at the Site, you will receive a separate letter clearly stating such a determination as well as the basis the EPA has for the determination.

The Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) Section 104(e), 42 U.S.C. § 9604(e), gives the EPA the authority to require you to respond to this information request (see Enclosure 1). We encourage you to give this matter its full attention, and ***we respectfully request that you respond to this request for information within thirty (30) days of its receipt of this letter.*** You may designate another official with the requisite authority to respond on your behalf. However, failure to respond to this information request may result in the EPA seeking penalties of up to \$37,500.00 per day of violation. In addition, furnishing false, fictitious or fraudulent statements or representations is subject to criminal penalty under 18 U.S.C. § 1001.

Please provide a written response to Mr. Robert Werner, Enforcement Officer, at the address included in the Information Request. Please refer to the enclosures below, which include important instructions and definitions, as well as the questions for response, in the preparation of your reply to this Information Request.

If you have any questions regarding this letter, contact Mr. Robert Werner at (214) 665-6724. For legal questions concerning this letter, please have your legal counsel contact Ms. Amy Salinas, Attorney, at (214) 665-8063. Thank you for your attention to this matter.

Sincerely yours,

BACKGROUND INFORMATION

The Delta Shipyard Superfund Site (Site) is located in the City of Houma, the County of Terrebonne, and the State of Louisiana. The Site is situated south of Industrial Boulevard approximately one-half mile on the east and west sides of Dean Court. The Site does not have a street address.

For a number of years prior to 1986, the non-incorporated business entity known as Delta Shipyard (DS) operated a boat and barge cleaning and repair facility at the Site. Operations of DS included cleaning and repairing small cargo boats, fishing boats, and oil barges. Before repairs could be started, boats and barges had to be certified vapor free by the U.S. Coast Guard. In order for DS to accomplish this, boats and barges were steam cleaned to remove oily wastes. Recovered oil deemed usable during cleaning activities was collected and eventually sold. Oily waste from the cleaning process was stored in several unlined earthen pits. These pits were used as evaporation ponds. Reportedly, these pits were also used to dispose of oil field drilling material. Currently the EPA is aware of four evaporation pits on the site.

Currently available information indicates that, prior to 1986, DS operated as a non-incorporated business under the control and/or direction of one or more of the following business entities:

Delta Iron Works, Inc., a Louisiana corporation, and/or

Delta Iron Works, Inc., a Delaware corporation, recognized in Louisiana, and/or

Chromalloy American Corporation, a Delaware corporation, recognized in Louisiana, and/or

Chromalloy American Corporation, a Delaware corporation, recognized in Missouri, and/or

Chromalloy American Corporation, a Delaware corporation, and/or

Delta Services Industries, a Louisiana partnership.

RE: Your letter dated August 4, 1980

I have not received any correspondence requiring submittal of Quarterly Report on Hazardous Waste. In regards to your referenced notices mailed out on December 12, 1980 and April 3, 1980 to all generators of hazardous waste, I have received nothing with the exception of two notices of overdue quarterly reports which were sent to us by registered mail.

As you demanded, I am enclosing a second quarter report of materials handled. This requirement is extremely premature because there has not yet been a determination of whether or not we, in fact, handle hardous waste and are a hazardous waste generator or disposer.

I am in the process of gathering additional data to resubmit to you as requested for evaluation of our Hazardous Waste Permit Application. This application has been returned to us in need of additional information.

Additionally, we are being inundated with forms to fill from you, EPA, etc. and as a result, have contracted T. Baker Smith and Associates and Steimle & Associates to give us assistance in gathering the necessary data and deciphering the requirements. Please bear with us because this will take some time.

Also I request that equal emphasis be placed on issuing pertinent information and permits as is paid to issuing notices of failure to comply and prosecution. We are genuinely interested in abiding with governmental regulations not in trying to avoid them. Constant threats are not necessary and are hindering our progress toward a mutual goal.

Sincerely,

Chris Olivier

Subject: Closure of pit

Dear Sir:

Enclosed please find the EP toxicity analysis made by Professional Services Industries, Inc. on samples taken from a pit associated with our barge cleaning facility.

This pit has been in service about six years and was used as a secondary oil/water separator, i.e. to separate out the oil, etc., that got past the primary separator. See sketch of pit enclosed.

On October 14, 1983 I had Horace Thibodaux of T. Baker Smith & Son (Environmental Research Dept.) come over and take samples—which he sent to Professional Services for analysis.

I need the pit area for other use so after the samples were taken I took advantage of the dry weather and mixed some dry topsoil in the pit to get the contents from a liquid state to a solid state.

A steel tank has been put in service to replace the pit. We felt that the pit was becoming an albatross around our neck when considering the associated expense and management time.

I am anxious to put this matter to bed and would appreciate your efforts to this end. Please call if you need additional information.

Sincerely,

Ralph A. Arceneaux
